

# Agenda

- 9:30-10am Coffee & pastries
- 10-10:20am: Introduction and Welcome
  - Interim Dean Pollock, College of Engineering
  - Prof. Tevfik Bultan, Department Chair
- 10:20-11:20am: Graduate Awards - Prof. Chandra Krintz
  - Graduate Alumni Awards (MS & PhD)
  - Outstanding BS/MS student
    - In memory of Caitlin Scarberry
- 11:20am-12pm: Undergrad Awards - Prof. Misha Sra
  - Undergraduate Alumni Award

## 2023 Computer Science Award Ceremony

# Demand for Computing Education

Applications to Computer Science programs are at an all time high!

In terms of number of applications received by academic units:

- ***CS ranks 1st among graduate programs at UCSB***

~2K applications

~20% of all grad applications to UCSB

- ***CS ranks 2nd among undergraduate programs at UCSB***

10K+ applications

10-fold increase the previous decade

## # of Applications to Computer Science BS Degree

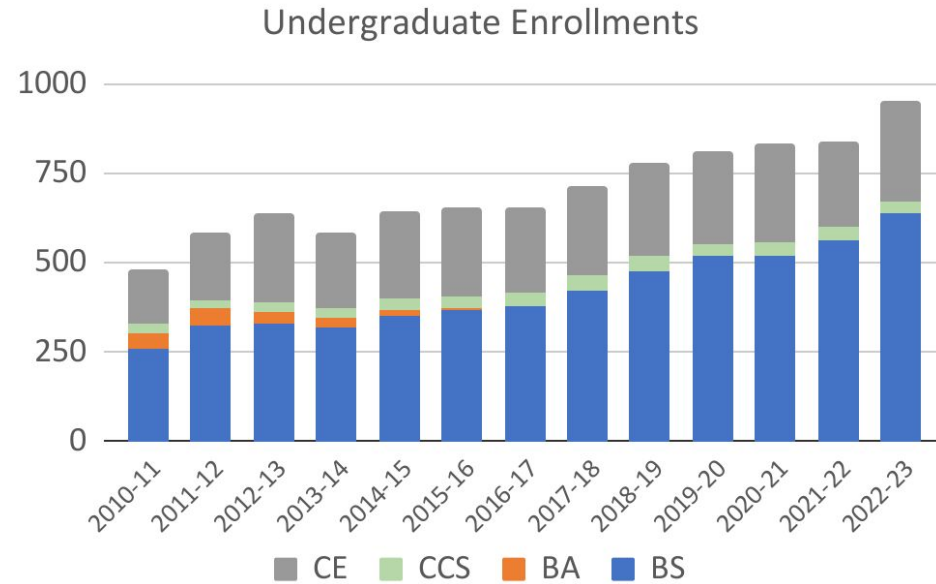

## # of Incoming Regents Scholars to Computer Science

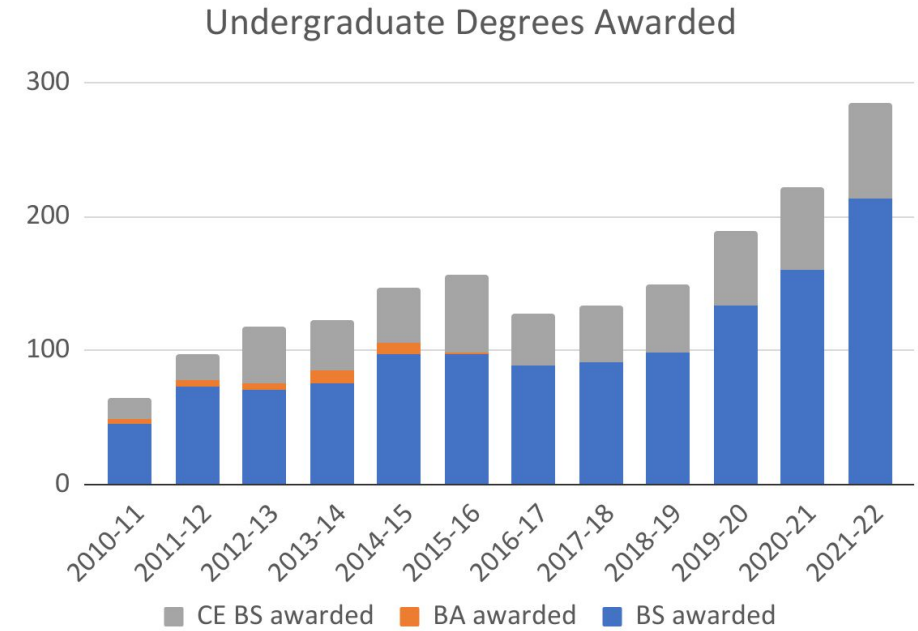

### ***UCSB CS class of 2026:***

- Among 5000+ UCSB freshmen, there are only 54 Regents Scholars, and 39 of them are CS students!

# Undergraduate Enrollments

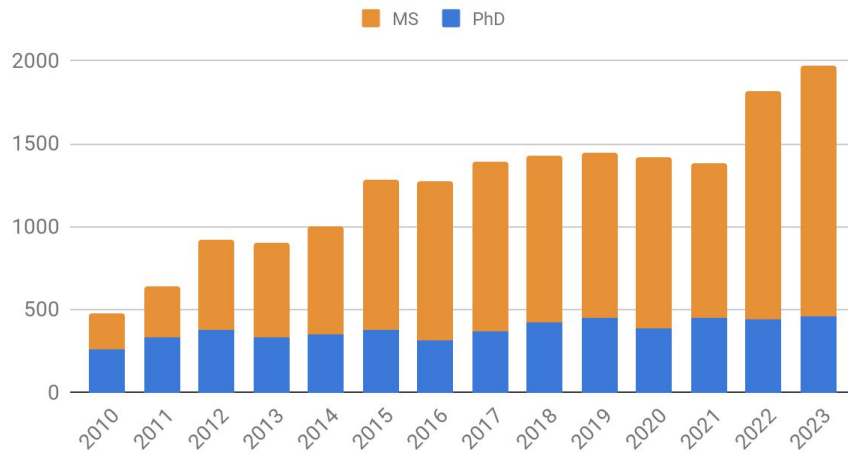

# # BS Degrees Awarded

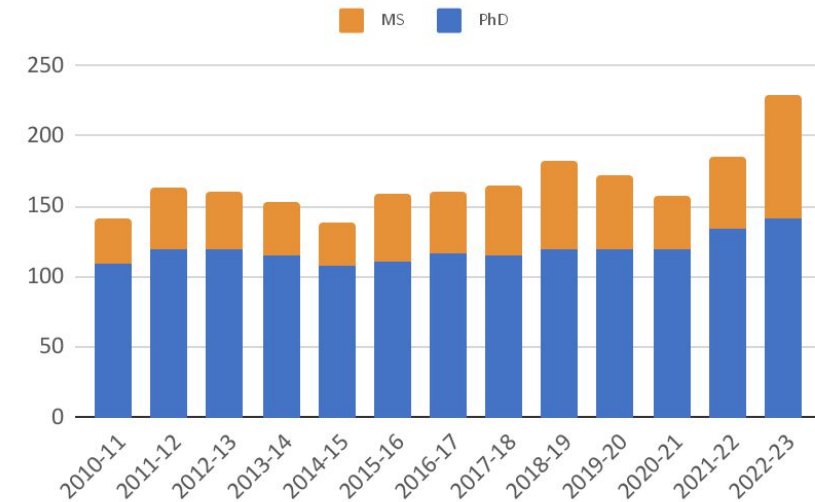

- Avg. Incoming Freshman GPA: 4.42
- Avg. Cumulative GPA: 3.65

# PhD & MS Demand, Enrollment & Degrees Awarded

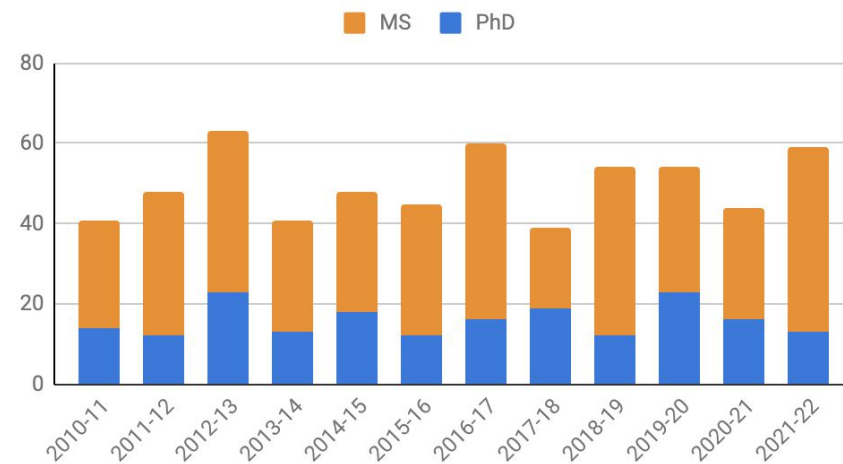

## Graduate Applications

## Grad Enrollment

## Graduate Degrees Awarded

# Computer Science is the Growth Engine of the College of Engineering

College of Engineering Undergraduate Enrollment

College of Engineering Graduate Enrollment

# 2020-2021

- **Jonathan Balkind**, Assistant Professor, Phd 2020 Princeton, Area: computer architecture, programming languages, operating systems
- **Shiyu Chang**, Assistant Professor, Phd 2016 UIUC, Area: machine learning, artificial intelligence, natural language processing, computer vision
- **Lei Li**, Assistant Professor, Phd 2011 CMU, Area: artificial intelligence, machine learning and natural language processing
- **Eric Vigoda**, Professor, Phd 1999 UC Berkeley, Area: randomized algorithms, computational complexity

2022

- PhD 2018 Rutgers University
- Area: computational science education, data science education, human information behavior

**Ziad Matni**  
Teaching Professor

2023

- PhD 2020 University of Calgary
- Research Area: high-performance scientific computing, data privacy and embedded ethics

**Maryam Majedi**  
Teaching Professor

# New Affiliated Faculty

**Haewon Jeong**, Assistant Professor, Department of Electrical and Computer Engineering

**Yao Qin**, Assistant Professor, Department of Electrical and Computer Engineering

# Outstanding Staff

**Greta Carl-Halle**  
*Business Officer*

**Sheryl Montoya**  
*Financial Services Manager*

**Maritza Fuljencio**  
*Student Affairs Manager*

**Alexander Molenaar**  
*Contracts & Grants Manager*

**Mackenzie Christie**  
*Contracts and Grants Analyst*

**Bryan Salazar Pazmino**  
*Undergraduate Program  
Coordinator*

**Hanna Wong**  
*Undergraduate Advisor*

**Bella Cardoso**  
*Graduate Advisor*

**Rosalia Torres**  
*Financial Administrator*

**Jasmine Moreno**  
*Communications & Special Events  
Assistant*

**Debra Nordyke**  
*Academic Personnel &  
Operations Coordinator*

**Tim Robinson**  
*Coordinator, Seclab & Network  
Science Research Group*

**Roxanne Morales**  
*Personnel Coordinator*

**Laura Langan**  
*Administrative Assistant, Crml*

**Noah Spahn**  
*Software Engineer, Seclab*

## UCSB to lead NSF-funded research institute for next-level AI-powered cybersecurity

MAY 4, 2023

This article was originally published by Sonia Fernandez with The Current.

Read the full article [here](#).

Malware. Ransomware. Zero-day exploits. There's no rest when it comes to protection from cyberattacks. And in an increasingly connected world, with expanding digital spaces and access to tools like artificial intelligence, attacks are likely going to become more sophisticated and numerous.

That's why a group of the nation's best computer scientists and engineers have come together to form the [National Science Foundation-funded Institute for Agent-based Cyber Threat Intelligence and OperatioN \(ACTION\)](#), an effort that brings the continuous learning — and now, reasoning — of AI to the constant situational awareness that is fundamental to cybersecurity.

## Jonathan Balkind Receives NSF Early CAREER Award to Go Faster in the Cloud

Achievements

Monday, March 20, 2023

by James Badham

**Jonathan Balkind**, assistant professor in the UC Santa Barbara Computer Science Department, has received a five-year, \$630,000 NSF Early CAREER award that will allow him to develop a new application for cloud computing.

Assistant Professor Johanthan Balkind.

"It's really an honor to receive the CAREER award!" Balkind said. "This is my first funded NSF proposal and was the first time I made a submission for the CAREER. I've had to pinch myself at least once to believe that it really happened. I'm really looking forward to driving this project over the next five years."

Balkind will use a technique called microarchitectural checkpointing to redesign computer processors for cloud-based serverless computing, which is a new paradigm favored by cloud developers.

## Prof. Elizabeth Belding's 1999 Article on AODV Routing Reaches 30,000 Citations

FEBRUARY 24, 2023

In 1999, Prof. Belding's first paper, co-authored by Charles Perkins of Sun Microsystems, introduced the Ad hoc On-Demand Distance Vector (AODV) routing protocol as a novel means of routing data packets in mobile networks. This work helped set the stage for networking in the then nascent mobile ad hoc and mesh networks and has heavily influenced the development of the research field in the subsequent two decades. The paper, which also received the 2018 ACM SIGMOBILE Test-of-Time award, has recently passed the 30,000 citation mark!

## Michael Beyeler Receives \$1.5 Million NIH Grant to Develop Bionic Eye

OCTOBER 5, 2022

This article was originally published by Andrew Masuda with The Current.

View the complete news release [here](#).

(Santa Barbara, Calif.) – Good vision is essential to everyday living, yet approximately 12 million Americans aged 40 and over live with vision impairment, including 1 million who are legally blind, according to the Centers for Disease Control and Prevention. Although some affected individuals can be treated with surgery or medication, and recent advances in gene and stem cell therapies are showing promise, no effective treatments exist for many people who are blinded by severe degeneration of, or damage to, the retina, optic nerve or the cortex. In such cases, an electronic visual prosthesis, or bionic eye, may be the only option.

[Michael Beyeler](#), an assistant professor of computer science and psychological and brain sciences at UC Santa Barbara, aims to bring to the mainstream an AI-powered bionic eye that can generate artificial visual information from a camera.

## An Empowering Fellowship

Thursday, October 13, 2022

**Fuheng Zhao**, a third-year PhD student in UC Santa Barbara's Computer Science (CS) Department, has received a prestigious [Microsoft Research PhD Fellowship](#). The fellowship funds two years' worth of tuition and fees, and provides an annual cash stipend of \$42,000. Fellows also receive opportunities to build relationships and collaborations with Microsoft research teams. The technology company launched the global fellowship program to identify and empower the next generation of exceptionally talented computer science researchers. According to Microsoft Research, the program received a record number of applications this year, and the thirty-six recipients should interpret the fellowships as recognition of their accomplishments and the potential for future impact Microsoft sees in them and their research.

## Marianne Arriola Received NSF's Prestigious Graduate Research Fellowship

APRIL 4, 2023

Marianne Arriola, who is working in the [Dynamo lab](#) with Professor Ambuj Singh, is the proud recipient of NSF's prestigious Graduate Research Fellowship. She is a Computing student in the College of Creative Studies (CCS) and a UCSB CSEP research intern. Her research interests are in computational biology, data mining, applied machine learning, and dynamical systems modeling.

This fellowship aims to support a diverse and high achieving scientific and engineering workforce, particularly in underrepresented groups.

## DARPA Selects UCSB Led Team for the HARDEN Program

DECEMBER 8, 2022

A UCSB led team was one of the eight teams selected by DARPA for the Hardening Development Toolchains Against Emergent Execution Engines (HARDEN) program. HARDEN program's goal is "to create practical tools that will prevent exploitation of integrated computing systems by disrupting the patterns of robust, reliable exploits used by attackers, and depriving the attackers of emergent execution engines."

The UCSB project is titled: "EMERGENCY: A Unified Framework for Discovering, Modeling, Analyzing & Mitigating Adversarial Emergent Computations." The PIs for the project are Professors Tevik Bultan (lead), Yu Feng, Christopher Kruegel, and Giovanni Vigna from UCSB, and Professors Aravind Machiry (UCSB CS alumnus) and Milind Kulkarni from Purdue.

## Greedy Optimization of Electrode Arrangement for Epiretinal Prostheses

Ashley Bruce

Ashley Bruce is a recent graduate from UCSB and a Software Engineer at Veeva.

Michael Beyeler is an Assistant Professor in Computer Science and Psychological & Brain Sciences at the University of California, Santa Barbara.

Ashley and Michael speak to us ahead of their poster presentation this afternoon about their work exploring the optimal arrangement of electrodes in epiretinal prostheses.

## CS Alumnus Wenhui Chen Named Canada CIFAR AI Chair

OCTOBER 27, 2022

CS Alumnus Wenhui Chen has been named one of eight new Canada CIFAR AI Chairs. Professor Chen will work with the nation's leading researchers to build a powerful artificial intelligence research ecosystem, in order to propel Canada's lead in priority areas under the Pan-Canadian Artificial Intelligence Strategy at CIFAR.

Professor Chen's appointment will bolster Canadian research in priority areas of the second phase of the Pan-Canadian AI Strategy, which consists of AI for health, AI for energy and the environment, the fundamental science of AI, and the responsible use of AI.

In the CIFAR press release, Executive Director of the Pan-Canadian AI Strategy, Elissa Strome, said, "The new Canada CIFAR AI Chairs joining Amii and the Vector Institute are an extraordinarily talented group of researchers who will continue to educate and inspire the next generation of AI leaders and advance research in exciting and important areas".

Wenhui Chen received his PhD from UCSB in 2021, where he was advised by CS Associate Professor [William Wang](#). Professor Chen went on to become an Assistant Professor at the University of Waterloo in June 2020. He is currently a Research Scientist for Google, where he focuses on research in Natural Language

# A Rising Star in Computer Science

## Achievements

Wednesday, October 26, 2022

UC Santa Barbara computer science PhD student **Sharon Levy** has been selected to participate in the prestigious **Electrical Engineering Computer Science (EECS) Rising Stars program**. The annual event is an intensive two-day workshop for graduate students and postdoctoral scholars of historically marginalized or underrepresented genders who are interested in pursuing academic careers in electrical engineering, computer science, and artificial intelligence (AI) and decision making.

"Being invited to the workshop is a great academic opportunity, and I am extremely happy to have received this recognition," says Levy, who is one of eighty-five people invited to this year's workshop, hosted by the University of Texas at Austin on October 27 and 28.

2022 EECS Rising Star Sharon Levy, a fifth-year computer science PhD student

## Yimeng Liu Named Finalist for Qualcomm Innovation Fellowship

NOVEMBER 3, 2022

Third-year PhD student Yimeng Liu was selected as finalist of Qualcomm Innovation Fellowship (QIF) Together with Pulkit Tandon from Stanford University, they proposed "Ultra-Low Bandwidth Stream Talking-Head Videos via Generative Models".

The Qualcomm Innovation Fellowship (QIF) supports PhD students in their research endeavors, in advance the next generation of technological innovation. Finalists were selected from a pool of proposals across the globe.

Yimeng works with Professor **Misha Sra** at Perceptual Engineering Lab. She is interested in design studying machine learning enabled human-computer interaction systems.

## CS Student Anisha Kabir Named Honorable Mention for Outstanding Undergraduate Researcher Award

DECEMBER 28, 2022

CS student Anisha Kabir was named Honorable Mention for the Computing Research As 2023 Outstanding Undergraduate Researcher Award.

Anisha began her research through Professor Diba Mirza's Early Research Scholars Program she joined the NLP group, working under the guidance of Professor William W. Sun on improving long text summarization models. Her group was able to publish and present at the Language Resources and Evaluation Conference. The following year Anisha worked with Alex Mei and mentor Sharon Levy on mitigating unsafe recommendations within natural language and they published their work at the Conference on Empirical Methods in Natural Language Processing.

## Zichen Chen Receives the Innovative Application of AI Award from AAAI

FEBRUARY 24, 2023

Zichen's paper titled "Efficient Training of Large-scale Industrial Fault Diagnostic Models through Federated Opportunistic Block Dropout" won the Innovative Application of AI award from the Association for Advanced Artificial Intelligence (AAAI) on February 9th, 2023. The paper was presented during the [35th Annual Conference on Innovative Applications of Artificial Intelligence \(IAAI-23\)](#) held in Washington DC, USA from 7 to 14 Feb 2023. The IAAI Conference, through the Innovative Applications of AI Awards, honours case-study papers that describe deployed applications with measurable benefits that include some aspects of AI technology (<https://aaai.org/about-aaai/aaai-awards/>).

The team from Nanyang Technological University led by Prof. Han Yu and Zichen have proposed a new

## Congratulations to our 2023 summit.cs Winners

MARCH 22, 2023

The UC Santa Barbara Computer Science Department hosted its annual summit.cs event, uniting undergraduate and graduate students, faculty, alumni, and industry partners in a program of sharing ideas and making connections. The event included Capstone presentations and awards, as well as a distinguished lecture by David Fenke – an American entrepreneur, businessman, and technical advisor. Fenke currently serves on the UCSB College of Engineering Dean's Cabinet and has been a trustee of the UC Santa Barbara Foundation since 2017.

TRANQUILITEA (partner: WellHealth) placed first, while FAT STACKS (partner: Allthenticate) placed second. Finally, OVERSEA (partner: NavSea) landed third place. Congratulations!

Watch summit.cs 2023 [here](#).

## Udit Paul, Jiamo Liu, Arpit Gupta and Elizabeth Belding receive Best Long Paper Award at ACM Internet Measurement Conference 2022

NOVEMBER 9, 2022

Udit Paul, Jiamo Liu, Professor Arpit Gupta and Professor Elizabeth Belding's paper, "The Impact of Contextualization of Crowdsourced Active Speed Test Measurements", has been awarded the Best Long Paper Award at the ACM Internet Measurement Conference 2022 (IMC 2022).

Professor Belding summarized their paper as follows:

"This work is timely given the recent focus on crowdsourced speed test measurements for policy-related decision-making. Our paper argues that using these measurements without understanding their context is problematic. Though the community had internalized that speed-test results can be misleading, no one knew the extent of the skew in such crowdsourced datasets. One significant roadblock in contextualizing these measurements was the lack of a subscription tier (10 Mbps vs. 100 Mbps plan). A speed test result of 10 Mbps is just a user subscribed to a 10 Mbps plan, but it is quite problematic if it subscribed to a

# **Computer Science Presents:**

Distinguished Graduate Alumni Awards

# Computer Science Distinguished MS Alumnus Award

**Sanjay Suri**

**Chief Product and Technology Officer – Nykaa**

Sanjay Suri is the CTO of Nykaa – He is an Internet Entrepreneur based in New Delhi. He earned his bachelor's degree in Mathematics and Masters degree in Computer Science in India before coming to UCSB, where he graduated with a MS in Computer Science.

Over his career of 25 years he has worked both in the US and India across large technology giants - Oracle Corp and Amazon - and multiple startups. He has spent more than half his professional life in startups and he attributes his affinity to startup life to his spirit of Adventure.

He is an avid trail runner, triathlete and spends a substantial time trekking and bike packing.

# Computer Science Distinguished PhD Alumnus Award

**Dr. Luca Foschini**

**President & CEO of Sage Bionetworks**

Dr. Luca Foschini is president and CEO of Sage Bionetworks. Prior to this, he co-founded and served as Chief Data Scientist at Evidation for 10 years. Dr. Foschini's has focused on digital medicine, particularly in the areas of data collection and analysis methodology. He has co-authored more than 70 peer-reviewed articles and given talks on topics including machine learning in healthcare, continuous health monitoring, and privacy in high-dimensional data.

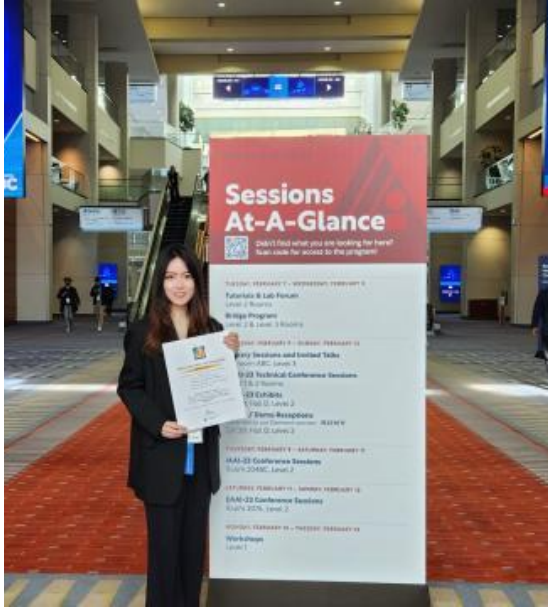

Luca holds a PhD in Computer Science from UCSB and a Master's degree in Computer Engineering from the Sant'Anna School of Pisa. He has also conducted theoretical computer science and cybersecurity research in academia and industry, including research positions at Google and Ask.com.

# Computer Science Presents:

Graduate Student Awards

# 2022-23 Graduate Student External Awards

**Zichen Chen**

Advisor: Misha Sra

Selected as the 2023 AAAI recipient of the Innovative Applications of Artificial Intelligence Award. IAAI honors case-study papers that describe deployed AI technology applications with measurable benefits

**Sharon Levy**

Advisor: William Wang

Selected as one of 150 women nationwide invited to the 2022 Rising Stars in Electrical Engineering and Computer Science (EECS) Workshop and hosted by UT Austin

**Yimeng Liu**

Advisor: Misha Sra

Selected as the 2022 Qualcomm Innovation Fellowship Finalist, which invests in University PhD students and their forward thinking ideas.

# 2022-23 Graduate Student External Awards

**Fuheng Zhao**

Advisors: Divy Agrawal & Amr El Abbadi

Selected as one of 36 recipients globally of the Microsoft Research Fellowship, presented to exemplary students to acknowledge their contributions & provide funding for their research

UC **SANTA BARBARA**  
Computer Science

**GauchoAI Team**

Advisors: Xifeng Yan and William Wang

Selected as the 2nd place team in the worldwide Alexa Prize SimBot Challenge. The Alexa Prize is a unique industry-academia partnership program which provides an agile real-world experimentation framework and tools for accelerating scientific discovery. University students have the opportunity to launch innovations online and rapidly adapt based on feedback from Alexa customers. The SimBot Challenge's goal is to advance the development of next-generation virtual assistants that help humans complete real-world tasks by continuously learning.

Selected for a Graduate  
Dissertation Fellowship

# UCSB 2023 University Award of Distinction

- Presented annually to graduating graduate students in recognition of excellence to students who have made an outstanding contribution to a particular area of UCSB student life and community activities.
- The awards recognize academic achievements along with in-depth or focused involvement and significant achievement in campus or community activities.
- Alex is involved in the CS Early Research Scholar Program (ERSP), as well as completing his own graduate research including publishing papers, and also has been an Undergraduate Learning Assistant and a Teaching Assistant for CS

**Alex Mei**

Advisor: William Wang

# College of Engineering Outstanding Teaching Assistant

- Presented annually in recognition of excellence as a Teaching Assistant, as selected by the graduating seniors in Computer Science
- **From students:** *“Junrui is one of the best TA's I've worked with throughout my undergrad. He always goes above and beyond in helping students. He is extremely accommodating with his office hours, going so far as to be available for whole days to help students with assignments. He is very patient when explaining difficult concepts and is always available and reachable over Slack. Without his help, I would not have enjoyed or learned as much from this class.”*

**Junrui Liu**  
Advisor: Yu Feng

# Computer Science Outstanding TA Co-Award

- Presented annually in recognition of excellence as a Department of Computer Science Teaching Assistant
- **From faculty:** *“Alex’s innovative approach to teaching is truly impressive... What sets Alex apart from other TAs is their unwavering commitment to student success. Alex is without a doubt the best TAs I have had the privilege of working with in my 15 years in academia.”*
- **From students:** *“He is always very clear and explains the questions completely. Alex is very responsive and designed great materials. He made sure to spend time with every student and answer all their questions. He explained things thoroughly and provided resources. He understood all the course material very well and was a great teacher. Alex was the best!”*

**Alex Mei**  
Advisor: William Wang

# Computer Science Outstanding TA Co-Award

- Presented annually in recognition of excellence as a Department of Computer Science Teaching Assistant
- **From faculty:** *“Under her preparation and demonstration, we were able to run the machine problem and its automatic evaluation using gradescope platform and real datasets for training neural network models. Krushna completed a great effort in making the course better and helping our students learn more.”*
- **From students:** *“Krushna did a great job teaching and her section was run well. She is amazing, patient and very nice. She is good at explaining ML concepts and terminology for homework.”*

**Krushna Chirag Shah**

Instructor: Lei Li

# Computer Science Outstanding Publication Co-Award

- Presented annually in recognition of excellence as a main contributor of a paper accepted or published in 2022-23
- Lead author Robert McLaughlin
- For the paper titled “A Large Scale Study of the Ethereum Arbitrage Ecosystem” which appeared at USENIX Security 2023
- Co-authors: Christopher Kruegel and Giovanni Vigna

**Robert McLaughlin**

Advisors: Christopher Kruegel  
and Giovanni Vigna

# Computer Science Outstanding Publication Co-Award

- Presented annually in recognition of excellence as a main contributor of a paper accepted or published in 2022-23
- Lead author Udit Paul
- For the paper titled “The Importance of Contextualization of Crowdsourced Active Speed Test Measurements”
  - The paper received the Distinguished Paper Award at the 2022 ACM Internet Measurement Conference
- Co-authors: Jaimo Liu, Mengyang Gu, Arpit Gupta and Elizabeth Belding

**Udit Paul**

Advisor: Elizabeth Belding

# Computer Science Outstanding Mentoring Award

- Presented annually in recognition of significant contributions to mentoring undergraduate students
- **From faculty:** Sharon “has mentored a total of 14 undergraduate students for their Computer Science research in the last three years. By mentoring, I mean that every single week she devoted numerous hours of her time to talk to these students, and guide their research... Under her guidance, 9 students have published 5 papers at to computer science venues, which consistently have acceptance rates lower than 25%.”
- **From students:** “Sharon excels by being responsive and always making time for her mentees for any questions we may have; she is willing to dive deep into technical issues that arise and frequently provides invaluable insights to help strengthen our research projects.”
- Sharon also won the competitive **2023 UCSB Graduate Division Fiona & Michael Goodchild Campus Graduate Mentoring Award**, which recognizes one PhD student each year campus-wide that has distinguished themselves as a mentor of undergraduates

**Sharon Levy**  
Advisor: William Wang

# Computer Science Outstanding Dissertation Co-Award

- Presented annually in recognition of a Ph.D. dissertation of technical excellence and high impact
- **Thesis topic:** “Responsible AI via Responsible Large Language Models”
- Sharon is a leading scholar in the emerging area of Responsible AI with international reputations and she has published 16 top conference and journal papers at premier venues in Artificial Intelligence.
- UCSB has acknowledged Sharon’s research with three distinct fellowship awards: the Regents Fellowship in Computer Science, the Holbrook Foundation Fellowship, and the Amazon Fellowship
- Sharon will complete a postdoc at Johns Hopkins in 2023 and has accepted an Assistant Professor position at Rutgers University in 2024

**Sharon Levy**  
Advisor: William Wang

# Computer Science Outstanding Dissertation Co-Award

- Presented annually in recognition of a Ph.D. dissertation of technical excellence and high impact
- **Thesis topic:** “Assessing the Presence and Extent of Digital Inequity”
- Udit’s dissertation research is addressing critical and timely problems around digital inequity in the U.S.
- He developed a broadband-plan querying tool (BQT) and this work has revolutionized the ability to analyze Internet Service Provider’s (ISPs) pricing trends, discovering wide-scale digital redlining.
- The information from his dissertation can arm residents, communities, and local governments with the data they need to challenge ISPs about over-stated coverage and poorly performing home connectivity.

**Udit Paul**

Advisor: Elizabeth Belding

# The Caitlin Scarberry Memorial Award

- The **Caitlin Scarberry Memorial Award** was established to honor the memory of Caitlin Scarberry, a 2019 UCSB BS/MS graduate in Computer Science, who died from brain cancer in 2021. Caitlin's prime motivation was to make a positive impact on the world and to encourage other women to follow her path to pursue careers in Computer Science and Engineering.
- This award is presented annually to an outstanding BS/MS student who has excelled in their academics as well as in research, teaching, and/or impact to diversity, equity, and inclusion (DEI)

# The Caitlin Scarberry Memorial Award: Computer Science BS/MS Student of the Year

- Presented annually in memory of Caitlin Scarberry and in recognition of an outstanding BS/MS student who has excelled in their academics in addition to research, teaching, and/or DEI

## Contributions:

- **Research:** Alex has published two first-authored papers at top AI conferences with another THREE papers under review. He is by far the most passionate research student ... [and will likely] become the most influential AI researcher in the history of our BS/MS classes
- **TA/ULA Performance:** Alex has been a ULA/TA for 4 quarters: (for CS8, CS16, CS165B, and CS190I special topics). Alex is the best TA that I have experienced ... at UCSB
- **Course Performance:** he ranks #1 in his class with 4.0 GPA with mostly A+ in his courses.
- **Participation in DEI Related Activities:** Alex spends more than 5-10 hours per week mentoring ERSP students, a program dedicated to promoting diversity in CS

**Alex Mei**

Advisor: William Wang

# Computer Science MS Student of the Year

- Presented annually in recognition of a Masters student who has excelled in both research and either department service or teaching
- **From faculty:** *"Reeva was my TA for multiple quarters and is one of the best TAs I have ever had, her MS project was just mind blowing (she built this whole healthcare system herself). She has a 4.0 in our program with multiple A+ grades. She is a brilliant, kind, thoughtful, creative, and driven individual."*
- *"I learned from Reeva that you can do a master project in a way that is full of passion, leadership and great execution. I will take her project as a role model for my future MS projects."*

**Reeva Mishra**

Advisor: Xifeng Yan

# Computer Science PhD Student of the Year

- Presented annually in recognition of a Ph.D. student who has excelled in both research and either department service or teaching
- **From faculty:** *“Yanju’s research is in the general field of software engineering (SWE) and programming languages (PL) ... Yanju’s award-winning work has made outstanding contributions in tackling some of the key challenges in program synthesis.”*
- Yanju published ten papers in *all* of the top conferences in SWE and PL: PLDI, OOPSLA, CAV, FSE, ASPLOS, and Security & Privacy
  - He won the ACM SIGPLAN distinguished paper award at PLDI 2022.
- He was the teaching assistant for a wide range of CS courses including a special topics course in program synthesis, PL, data structures, introductory programming, CS foundations, and an introductory CS course for non-majors

# Computer Science Presents:

Distinguished Undergraduate Alumnus Award

# CS Distinguished Undergraduate Alumnus Award

**Michael Rosengarten**

Founder and CEO, Camino Technologies

**UCSB: BS CS 2010**

During his time at UCSB, Michael served in a number of service roles in our community, including as President of UCSB's ACM Chapter. Since graduating from UCSB CS in 2010, Michael first worked at Yahoo, before becoming a Co-Founder and CTO at OpenGov. He served as Founder and CEO of Persista before most recently founding his startup, Camino Technologies.

Camino's mission is "Economic development is critical to creating safe and vibrant communities. That's why we're building the next generation of technology to power the permitting process: beautiful, intuitive, and intelligent software that cuts down growing workloads while seamlessly connecting citizens with their governments."

# Computer Science Presents:

Undergraduate Student Awards

# Computing Research Association's Outstanding Researcher Award Honorable Mention

- This prestigious award program recognizes undergraduate students in North American colleges and universities who show outstanding research potential in an area of computing research
- Anisha started in research through the Early Research Scholars Program, working in Natural Language Processing. Her team's paper, "Mitigating Covertly Unsafe Text within Natural Language Systems" was published in EMNLP 2022.

**Anisha Kabir**  
**Honorable Mention**  
Advisor: William Wang

# Barry Goldwater National Scholarship and Excellence in Education

- The Barry Goldwater Scholarship and Excellence in Education Foundation was established by Congress in 1986 to serve as a living memorial to honor the lifetime work of Senator Barry Goldwater.
- Marianne was selected as one of 417 undergraduate student recipients across the nation.
- “The Goldwater scholarship reinforced my goal to obtain a PhD.”

**Marianne Arriola**  
Advisor: Ambuj Singh

# National Science Foundation Graduate Research Fellowship Program

- The NSF Graduate Research Fellowship Program (GRFP) 5-year fellowship seeks to ensure the quality, vitality, and diversity of the scientific and engineering workforce of the United States.
- Marianne Arriola is a Computing student in the College of Creative Studies (CCS) and a UCSB CSEP research intern. Her research interests are in computational biology, data mining, applied machine learning, and dynamical systems modeling.

**Marianne Arriola**  
Advisor: Ambuj Singh

# UCSB Chancellor's Award for Excellence in Undergraduate Research

- Presented to four distinguished undergraduate researchers each year at UCSB, intended to honor exemplary contributions to research in their discipline.
- Research contribution: started research via Early Research Scholars Program (ERSP) in natural language processing (NLP) and with NLP research group. Research paper was accepted by the International Conference on Learning Representations (ICLR) in 2023 and presented his work at the event.

**Matthew Ho**

Advisor: William Wang

# UCSB 2023 University Award of Distinction

- Presented annually to graduating students in recognition of excellence and who have made an outstanding contribution to a particular area of UCSB student life and community activities.

**Doris Wei**

# College of Engineering Outstanding Senior Award

- Presented annually by the College to the graduating senior(s) with the highest cumulative grade point average from each degree program.

**Nicholas Brown**

# College of Engineering Hynes-Wood Award

- Presented annually by the Engineering Student Council in recognition of outstanding contributions to student activities in the College of Engineering.

**Shivani Sista**

## **Best Project: TRANQUILITEA**

- **Partner:** Artera
- **Team:** Heather Dinh (Lead), Victoria Reed (Scribe), Archana Neupane, John Rollinson, Samar Khan
- **Project Overview:** Create an app that by reducing anxiety levels of patients will hopefully serve to better mental health. Through this app, patients can visualize their improvement over several days as their biometric data analysis and self-reflections will be recorded.

# CS Distinction in the Major Capstone Track

Yuan-Fang Wang

# Computer Science Outstanding Undergraduate Research Award

- Presented annually in recognition of outstanding contributions, and sustained commitment and excellence in research contributions.
- Marianne has focused on computational biology and deep learning for 3D vision and has made contributions in the space of machine learning for graphs. After graduation, she will join Cornell University's PhD program

**Marianne Arriola**  
Advisors: Ambuj Singh

# Computer Science Outstanding Mentor Award

In recognition of outstanding and sustained teaching and mentorship

**Zackary Glazewski**

**Bryan Zamora Flores**

# Computer Science Student of the Year

- Presented annually in recognition of outstanding leadership, excellence in academics and research, and performing “above and beyond the call of duty” when engaging with students and the CS community
- Shivani is an Engineering Honors student, and her participation includes: President of UCSB Society of Women Engineers (SWE), CS Early Research Scholar Program (ERSP), CS Bionic Vision Lab (Research), and UCSB Pops Orchestra (violin)
- After graduating in 2024, plans to either attend medical school or pursue a graduate degree involving research in the medical and bioengineering fields.
