

Department of Computer Science

Five-year BS/MS Program

What is the BS/MS Program?

The BS/MS Program in Computer Science is an academic program that allows participants to obtain both a Bachelor of Science in Computer Science, Computer Engineering, or Computing (CCS) and a Master of Science in Computer Science in 5 years. Participants are allowed to take graduate courses in Computer Science during the final year of their B.S. degree, which can be used toward satisfying M.S. degree requirements.

Why should I apply?

There are several reasons a student may consider applying to the BS/MS program:

- By completing a Master of Science degree, your knowledge of Computer Science will be deeper, better preparing you, and your résumé, for success in industry.
- You will experience the excitement of participating in cutting edge Computer Science research.
- BS/MS students save time and money by completing their Master's degree in one additional year instead of two.
- Approximately 1,000 applications are submitted each year for our MS programs during the annual formal application cycle. The BS/MS program gives high-achieving UCSB students an opportunity to be considered for our graduate program as part of a much smaller applicant pool.

Who is eligible to apply?

If you want to acquire an advanced degree in Computer Science, or think that you may want to do so, then you should *immediately* set your academic goals high enough for admission to the program.

- Eligible applicants are in their third year; i.e. have, ideally, at least 3 undergraduate quarters remaining.
- Applicants must have completed at least 3 upper division courses.
- Admission is offered to our most accomplished and creative undergraduates; acceptance to the BS/MS program is an honor. Applicants must have a minimum 3.0 overall GPA to be considered, successful applicants generally have a GPA of at least a 3.5.

*If you are a prospective applicant, you should visit the Computer Science Advising Office at the **beginning** of your third year, as you will need to plan your schedule differently than undergraduates with terminal B.S. degrees.*

Second Year

Formulate your career goals as clearly as you can and determine which academic program will best meet those goals. You may wish to consult with Computer Science faculty to help with this formulation, as well as your course planning.

Third Year

Begin speaking with an advisor about how you should plan your courses this year to prepare for the possibility of taking graduate courses in your fourth year. During the final quarter of your third year, you will submit your BS/MS application to the Computer Science Department. Please note that exceptions can be made for students who have accelerated their program and play to finish by the end of their 3rd year.

Fourth Year

In order to complete the program in 5 years, you must plan to take 2-3 graduate courses during your fourth year. Graduate courses are generally twice as much work as undergraduate classes, so you will need to plan your schedule accordingly. Once you are in your final quarter of your undergraduate degree, you **MUST** request to advance to graduate standing. **Strict deadlines exist**, so please schedule a meeting with the CS Undergraduate Advisor the quarter before for a degree audit, and with the CS Graduate Advisor to inform them of your intentions.

Master's/Fifth Year

You will work with the CS Graduate Advisor to make sure you understand and meet all requirements. Please note that MS students are required to be in graduate standing for a minimum of 3 quarters in order to be granted their MS degree. While most BS/MS students finish both degrees in 5 years, this is not a strict rule.

How to Apply

Submit the BS/MS application to the Department of Computer Science during the last quarter of your third year (*NOTE: Transfer students please see the CS Department regarding this requirement*). **We only accept applications once per year.** The completed application packet includes:

1. Three letters of recommendation, preferably from Computer Science faculty, submitted directly to the CS Graduate Student Advisor.
2. A statement of purpose: what are your academic and career goals? What has prepared you to achieve these goals?
3. A statement of personal achievements: what challenges have you faced in your academic or personal life that you've overcome? What factors have made your achievements exceptional?
4. An unofficial transcript downloaded through GOLD (an official transcript will be required when advancing to graduate standing).
5. A list of your undergraduate major field electives and all courses remaining, at the time of application, to complete your undergraduate degree.
6. A proposed MS study plan (*Note: Any graduate courses taken prior to admission into the program cannot count towards the MS requirements*).

2020-2021 APPLICATION DEADLINE: MAY 15, 2021

For any questions or information regarding this program, please contact the Graduate Advisor, Karen van Gool by email kvangool@cs.ucsb.edu, phone (805)-893-4322 or in 2104 HFH from 9-12PM or 1-4PM.

BS/MS STUDY PLAN

This study plan is not required to be submitted with your application. However, it is important that you plan the next three years carefully. If you have any questions or would like advice, contact the CS Undergrad Advisor.

Take 2 graduate (200 level) courses per quarter

Take 1 seminar (595)

Take 8 units of 596 research and complete project

**Based on project option. For exam or thesis information, please contact the Graduate Advisor.

Required Application Materials

1. **Statement, Achievements, and Resume packet, which includes (all materials to be submitted electronically to the CS Graduate Student advisor):**
 - a. **Signed Coversheet**
 - b. **Statement of Purpose:** Give a brief statement outlining your reasons for undertaking a graduate program, your particular area of specialization within the major field, your past academic work, and your plans for future occupation or profession. Also include any additional information that may assist the selection committee in evaluating your preparation and aptitude for graduate study at UC Santa Barbara (1-1.5 pgs).
 - c. **Statement of Personal Achievements:** UC Santa Barbara is interested in a diverse and inclusive graduate student population. Please describe any aspects of your personal background, accomplishments, or achievements that you feel are important in evaluating your application for graduate study. For example, please describe if you have experienced economic challenges in achieving higher education, such as being financially responsible for family members or dependents, having to work significant hours during undergraduate schooling or coming from a family background of limited income. Please describe if you have any unusual or varied life experiences that might contribute to the diversity of the graduate group, such as fluency in other languages, experience living in bicultural communities, academic research focused on cultural, societal or educational problems as they affect underserved segments of society, or evidence of intention to use the graduate degree toward serving disadvantaged individuals or populations (1-2 pgs).
 - d. **Resume or CV:** List your positions of employment or volunteer work/community service since high school, either full or part-time, including the hours per week worked and the nature and dates of employment or service (1-2 pgs).

2. **Three letters of recommendation, preferably from CS faculty:**

Letters of recommendation should be emailed directly by faculty to the CS Graduate Advisor by the application deadline.

3. **Unofficial UCSB transcript:**
 - a. An unofficial transcript may be printed or downloaded through GOLD.

4. **Completed chart (attached):**
 - a. All undergraduate major field electives used to meet the relevant elective unit requirement.
 - b. All undergraduate courses remaining, at the time of application, to complete your undergraduate degree

5. **Proposed MS study plan (attached):**
 - a. The CS website provides a list of courses applicable to each area (*note: when completing this study plan, please remember that you should plan to take 2-3 graduate level courses during your senior year*)

Coversheet for Statement, Achievements, and Resume/CV

Name: _____ Perm #: _____ Date: _____
Last First

UCSB email address: _____ Citizenship: _____ Visa: _____

Current Department: _____ Current College: _____ BA BS

Research area of interest (optional): _____

Faculty interests (optional): (1) _____ (2) _____ (3) _____

Are you interested in pursuing a PhD in the future? Y N

Instructions:

Each of the three required documents below should be submitted as separate files. Filenames should include your name and indicate which document you are submitting, e.g. "lastname_firstname-SOP."

Statement of Purpose: Give a brief statement outlining your reasons for undertaking a graduate program, your particular area of specialization within the major field, your past academic work, and your plans for future occupation or profession (1-1.5 pgs).

Personal Achievements/Contributions: Please describe any aspects of your personal background, accomplishments, or achievements that you feel are important in evaluating your application for graduate study (1-2 pgs).

Resume or Curriculum Vitae: List your positions of employment or volunteer work/community service since high school, either full or part-time, including the hours per week worked and the nature and dates of employment or service (1-2 pgs).

If you have discussed your plans for graduate study with any UC Santa Barbara faculty, please list their names here: _____

BREADTH REQUIREMENTS (List Area)					

SEMINAR COURSES					
595					

ADDITIONAL COURSES					
Graduate (200-level)					
Undergraduate (100-level) except 193					
596 / 598					

REQUIREMENTS

- Total number of units: 42 (upper-division or above excluding CS 193)
- Take 4 CS graduate courses from major
- A CS graduate course must be taken from each of the other 2 areas
- Same course cannot be used to satisfy both major area and breadth requirements
- Receive at least a B in all major area courses
- Take 2 to 6 units of 595 research seminar (595N: Faculty Research Seminar does not count toward this requirement)

Thesis Additional Requirements

- At most 12 units of 596 and 598 may be used towards unit requirement

Comprehensive Exam Add'l Requirements

- Take 12 units which are 100-level (excluding 193) or 200 level courses
2 of which must be graduate courses (200 level)

Project Additional Requirements

- Take 6 units of 596 Directed Research
- Submit a project completed under permanent faculty direction
- Take at least 2 additional 200 level graduate courses
